

SELF-PACED LEARNING MODULE
Neonatal Hyperbilirubinemia: Screening, Assessment, Management
& Prevention of Kernicterus

Continuing Education Credits

The Community Perinatal Network and the Orange County Perinatal Council have provider status for continuing education through the California Board of Registered Nursing – Provider # CEP-8931 and 00050. This module has been assigned 2 contact hours for continuing education, which can be obtained after successful completion of the module through independent study or facilitated group study. Facilities choosing to provide credit can do so using their own continuing education provider status. Nurses using the independent study format or facilitated group study must complete and return the following to either CEU provider listed.

Read the following two professional articles regarding neonatal hyperbilirubinemia:

- a. American Academy of Pediatrics, Clinical Practice Guideline (2004). Management of Hyperbilirubinemia in the Newborn Infant 35 or More Weeks of Gestation. *Pediatrics*, Vol. 114 (1): 297-315.
- b. Steffensrud, S. (2004). Hyperbilirubinemia in Term and Near –Term Infants: Kernicterus on the Rise? *Newborn and Infant Nursing Reviews*, Vol. 4 (4): 191-200.

Complete the self-paced learning module.

Complete the post-test (passing score of 70% or greater).

Complete the study evaluation.

I, the undersigned, have completed the self-paced module and its requirements to obtain two (2) contact hours for continuing education.
