---	---

Any eligible inborn infant who dies in the delivery room or at any other location in your hospital within 12 hours after birth and prior to admission to the NICU is defined as a "Delivery Room Death." These locations may include the mother's room, resuscitation rooms, or any location other than the NICU in your hospital. Outborn infants and infants who are admitted to the NICU should not be classified as Delivery Room Deaths.

- The **"Identification and Demographics"**, **"Maternal History"** and **"Delivery Room and First Hour After Birth"** sections **must** be filled out when an eligible infant is admitted to your NICU.
- The **"Post-Delivery Diagnoses and Interventions-Respiratory"** (respiratory, infections, other diagnoses, surgeries, and surgical complications, neurological, and congenital malformations) and the **"Initial Disposition"** sections must be filled out when the baby is discharged for the first time from your center.
- The **"Transport Information"** section only needs to be filed out if the infant was transported after its initial stay.
