

## CCS Supplemental Form – Tip Sheet

Please refer to the instructions below on how to obtain the Live Births and Inborn Admissions for the CCS Supplemental Form from the resources listed below. This will assist in fulfilling task# 6 requirement in your Close-Out Checklist.

1. **Your Center’s internal NICU Log Sheet**
2. **The Optional NICU Admits Database**

This can be accessed by selecting the “Show Values on the Optional NICU Admits DB” button at the bottom right of the CCS Supplemental Form, shown in the graphic below.

\*Note that you must be a current participant of the Optional NICU Admits Database to benefit from this option .

3. **CCS Supplemental From**

If your **NICU is a satellite NICU (co-)located at a hospital with delivery services** and if live births are found for the co-located hospital, you can use the Populate Births button to populate the Total Live Births rows in Sections A and D based on information obtained by the CMDC from the California Department of Public Health.

**\*NOTE: This option was recently removed for all other NICUs that are not satellite NICUs. For all other NICUs, please skip to option 4 below.**

Section A	Section B	Section C	Section D	Section E	Section F	Q1 Prj 1			
<b>A. Hospital Births and Deaths of Infants Born in 2018 by Birth Weight</b>									
Infants Born Between 1/1/2018 and 12/31/2018		< 401 grams	401-500 grams	501-750 grams	751-1,000 grams	1,001-1500 grams	1,501-2500 grams	> 2500 grams	Total
<b>Total Live Births by Birth Weight in your center from 1/1/2018 to 12/31/2018</b>		<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>	0
Should be ... compared to your NICU Data submissions		≥ 0	= 0	= 0	= 0	= 0	≥ 0	≥ 0	≥ 0
Number of births based on your hospital's vital statistics birth data. Latest birth date reported for this birth year is		= 0	= 0	= 0	= 0	= 0	= 0	= 0	= 0

- Selecting the **Populate Births** button at the bottom of the CCS form will transfer the vital statistics based birth counts by birth weight/gestational age into the corresponding boxes of Sections A and D of the CCS form. Note that this transfer is reversible, i.e., you can restore the births data that were previously entered.
- We recommend that you check the vital statistics based births counts around the 15th of each month during the close-out period as some births are updated or reported late to vital statistics. This ensures that the births reported are the most accurate possible.
- Once the **Populate Births** button is selected, the button's label changes to **Restore Births Entries**. If you select the button **Restore Births Entries**, those entries will be restored that were in the births boxes just before you selected on **Populate Births**.

# CCS Supplemental Form – Tip Sheet

Note: Use of the **Populate Births** button is optional. If it is known that your Co-located hospital's vital statistics data has errors, then please feel free to use another source that is more accurate.

## 4. CMQCC Maternal Data Center (MDC)

You can also access these data in the CMQCC Maternal Data Center (MDC). A benefit of using the MDC is the ability to drill down to see the patient list for each category (available solely under Option A below).

### Option A: Direct login to the CMQCC Maternal Data Center

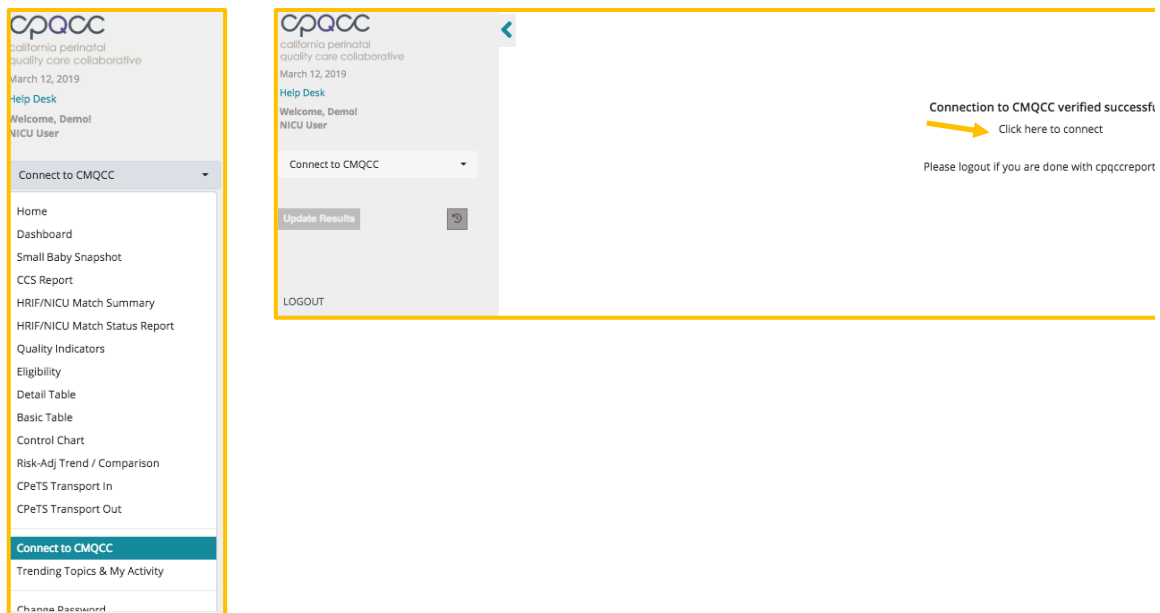

Direct login requires that you have your own CMQCC MDC Account; i.e. you need to be invited to access the MDC by a hospital colleague with an MDC Administrator role. If you need to be able to drill down to see the list of patients in each CCS category in the MDC, ask your MDC administrator to invite you with a MDC User Role of “Read Only: Aggregate and Patient-Level Data” or higher.

To identify the MDC Administrators for your hospital, contact [datacenter@cmqcc.org](mailto:datacenter@cmqcc.org)  
To log in directly (i.e. you already have an MDC Account), go to <https://datacenter.cmqcc.org>

### Option B: Login to [www.cpqccreport.org](http://www.cpqccreport.org), and then look for the link to the CMQCC Maternal Data Center.

To log in from [www.cpqccreport.org](http://www.cpqccreport.org):

- Click on **Connect to CMQCC** link near the bottom of the menu bar.
- Click on **click here** to connect link on the next page to log in.

# CCS Supplemental Form – Tip Sheet

- Once you're in the Maternal Data Center, you'll find the CCS reports by following these steps:

 Generating the CCHD-Pulse Oximetry data for the CCS report requires supplemental data submissions to the Maternal Data Center. [Learn more here](#)

## CCS Supplemental Form – Tip Sheet

- Download the data needed to propagate the CCS Supplemental Form for births by BWGT and by GA.
- Manually enter the numbers into the **live births sections** of the CCS Form (A and D).
- To see the list of cases for a category, click the green number for that category.

Demo Hospital: CCS Report (2019)

 These counts are derived from Birth Certificate data that is submitted by your hospital to Vital Records.  
These numbers will not match your CPQCC numbers; they include all live births, while CPQCC excludes GA < 22 weeks and BW < 400 grams.

### Birth Weight

Derived from Birth Certificate

Category	Count
Missing	0
Less than or equal to 400gms	0
401-500gms	0
501-750gms	0
751-1000gms	0
1001-1500gms	1
1501-2500gms	0
Greater than 2500gms	14

[Download CSV \(Excel\)](#)

### Gestational Age

Derived from Birth Certificate's OB Estimate of Gestational Age (weeks only)

Category	Count
Missing	0
Less than or equal to 21+6	0
22+0-31+6	1
32+0-33+6	0
34+0-36+6	1
37+0-38+6	7
39+0-41+6	6
42 weeks or greater	0

[Download CSV \(Excel\)](#)

## CCS Supplemental Form – Tip Sheet

5. **The Automated Vital Statistics System (AVSS) has switched to a new registration system called EBRs.**
  - Please consult your hospital's birth clerk for more detailed information, and to generate this report.
